Antariksh Bhavan, New BEL Road, Bengaluru-560094

On behalf of the Amateur Radio Society of India (ARSI) and the global amateur radio community, I wholeheartedly endorse and support the Beliefsat-0 project by the Student Satellite Program at K.J. Somaiya Institute of Technology.

ARSI, a leading Indian organization fostering amateur radio and space communication, acknowledges the remarkable efforts of the New Leap Initiative in developing the Beliefsat-0 nanosatellite. The dedication of the engineering students and faculty involved is commendable.

The Beliefsat-0 satellite's versatile Amateur Payloads, including UHF->VHF FM repeater, VHF ISS-style digipeater, and SSDV over APRS imagery payload, holds immense potential for advancing global amateur radio capabilities and inspiring space communication innovations.

Beliefsat-0 aligns perfectly with the Indian OSCAR initiative's vision of promoting collaboration and experiential learning in amateur radio community.

ARSI and the amateur radio community endorse Beliefsat-0 for inclusion in ISRO's PS4-Orbital Platform program. This satellite will be a valuable asset, fostering international goodwill and scientific exploration.

We support the New Leap Initiative and the Beliefsat-0 team, ready to contribute expertise, resources, and knowledge to ensure its success.

We urge the Proposal Review Committee to consider this endorsement as a testament to its significance. Let's create a positive impact and enrich the amateur radio community together.

Thank you for your attention. For further information or discussion, please contact us.

Yours Sincerely

A handwritten signature in black ink, appearing to read 'Govind', with a horizontal line underneath it.

Govind Girimaji VU2GGM

Secretary, ARSI
